THE **HARMONY**  
OF **COLOUR** SERIES

# ENDANGERED SPECIES

Stressed out at work? Are the pressures of the world getting you down? We guarantee relaxation with these complex Zen and anti-stress colouring pages for adults.

*Harmony of Colour: Endangered Species* offers detailed images and patterns that are chosen by experts for their soothing properties.

Be aware of the overall harmony of your colouring rather than focusing on each element individually. Try to balance the colours so that they are a reflection of your emotions of the moment. If the colours of your page are in harmony, then your mind will follow!

Now... grab your pencils or textas and de-stress...

“Animals are, like us,  
endangered species on  
an endangered planet,  
and we are the ones who  
are endangering them,  
it, and ourselves. They are  
innocent sufferers in a  
hell of our making.”

“What is a fish without  
a river? What is a bird  
without a tree to nest in?  
What is an endangered  
species act without any  
enforcement mechanism  
to ensure their habitat is  
protected? It is nothing.”

“If we human beings learn to see the intricacies that bind one part of a natural system to another and then to us, we will no longer argue about the importance of wilderness protection, or over the question of saving endangered species, or how human communities must base their economic futures - not on short-term exploitation - but on long-term, sustainable development.”

“The children and  
nature movement  
is fuelled by this  
fundamental idea: the  
child in nature is an  
endangered species,  
and the health of  
children and the  
health of the Earth  
are inseparable.”

“These magnificent species of Africa - elephants, rhino, lions, leopards, cheetah, the great apes (Africa has four of the world’s five great apes) - this is a treasure for all humanity, and they are not for sale. They are not for trade. They need to be valued and preserved by humanity. We all need a global commitment to that.”

“Man has been endowed with reason, with the power to create, so that he can add to what he’s been given. But up to now he hasn’t been a creator, only a destroyer. Forests keep disappearing, rivers dry up, wild life’s become extinct, the climate’s ruined and the land grows poorer and uglier every day.”

“One tragic example of the loss of forests and then water is found in Ethiopia. The amount of its forested land has decreased from 40 to 1 percent in the last four decades.

Concurrently, the amount of rainfall has declined to the point where the country is rapidly becoming a wasteland.”
